"PACE CAR PRO"

WITH THE INDUSTRY'S FIRST "ROBOT" PACE CAR!!

by Electra

Electra Games presents the newest of the Electronic Video games - but from a company that is one of the "oldest" in producing TV game electronics. "Pace Car Pro" is new in design, new in concept and has features never before designed into a video game (see reverse side).

ELECTRA GAMES, INC. • 2570 United Lane • Elk Grove Village, Illinois 60007 • (312) 595-1135

Among the following features of "Pace Car Pro" are several that are spectacularly different from other racing games:

★ ★ ★ ★ ★ ★ ★

★ Features the industry's first "Robot", a pace car that travels at a constant, predetermined rate of speed, against which the player(s) compete

★ The player(s) races against both the pace car and his opponent(s)

★ "Pace Car Pro" is the first four-car competitive racing game

★ The "joysticks" control direction, acceleration and braking - a real breakthrough in video games

★ The race starts with a flashing checkered starting line

★ Visible red collision flash is accompanied by realistic crash sounds

★ "Stop Action" freezes cars in position at end of game

★ Extended race play time is available (on option) for all cars when any driver outruns pace car

★ Speed of pace car is adjustable to location players' skill. Length of run is also adjustable to 6 or 8 laps. (These two options determine duration of game - from 1 to 2½ minutes)

★ High-reliability modularized solid state logic circuits.

★ All solid-state color video system which may be used and serviced as conventional color TV set

★ Handsome cabinet is solid lumber core (no "flakeboard" used) and designed to fit any location

★ Double security cash box with provision for internal lock

PRICING:

Quarter play with the potential of one dollar per game. Can also be set for 2 players per quarter.

SERVICE:

Removable cabinet top for easy access to solid state modules, television unit and coin equipment. All service from the top.

100% "thermal testing" of all integrated circuits simulates use under roughest conditions, adding up to a new level of reliability.

ELECTRA guarantees prompt and effective response to operators' service requirements. "From people who know their business"
